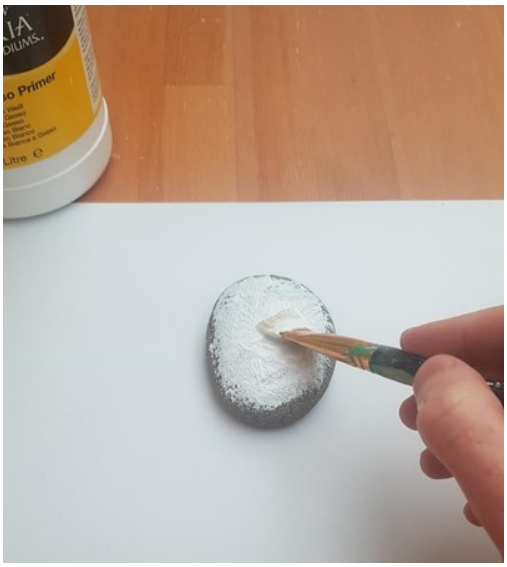
Pebble Painting

You will need:

- a nice round pebble
- white primer paint
- acrylic paints (or similar)
- varnish
- paint brushes
- a glass of water

1. Firstly, wash your chosen pebble under warm water to remove any grit or dirt.



2. Place the stone on a piece of paper or old newspaper and paint it white with primer. Allow one side to dry and paint the other side.

3. Once the white paint is dry on both sides, you can start decorating your pebble with your own design using acrylic paints.

4. Once the acrylic paint is dry, varnish your pebble and allow it to dry overnight. Find a special place in your garden or community for your pebble.
